Chair Emeritus:
Virginia K. Shehee

Honorary Member:
J. Bennett Johnston, Jr.

Dear Friends of the Biomedical Research Foundation:

I am writing to enlist your help and good efforts. A biotechnology company interested in establishing biomanufacturing operations in Shreveport has asked the Foundation to assist in identifying prospective qualified employees for them. Company officials seek both management and operations personnel to engage in the development and production of proprietary vaccines.

This is an occasion for our network of family, friends and colleagues to connect with career opportunities here in Shreveport. Please pass the word to those whom you believe might be interested in these positions. Prospective applicants may currently reside within the Ark-La-Tex region, or come from across the country. The company anticipates that hiring could begin by the end of March 2007.

Descriptions of the desired positions and instructions for submitting resumes are enclosed separately.

This is an exciting opportunity for our region. Thank you for helping us fulfill our commitment to build knowledge-based industries in northwest Louisiana.

Kind regards,

Dennis Lower
Vice President, Planning & Development
Director, InterTech Science Park

Attachment.
